Adhere the DSP along the right edge of the card front, centered between the top and bottom edges. The right edge of the card front should be flush along the left edge of the fun fold crease as pictured.
- Fold the right-most panel of the DSP fun fold over the front of the inner-right panel. Ensure correct placement by keeping the left three panels at 90-degrees and as straight as possible before adhering the DSP fun fold to the inside, center of the card base as pictured. Once adhered, the card should fold flat. **TIP: Use liquid adhesive, only in the center of the panel. This allows more "wiggle" room for adjustments when adhering.**
